Next js

Tailwind Css

Shadcn

Framer Motion

Git

Git Hub

Supabase

Product & UX/UI:

Vibe coding Prototyping

User flows · Wireframing · Vibe Coding

Landing pages (End-to-end: UX, copywriting, dev)

Marketing:

Growth marketer Tecnico

Viral loops-gamification

Campaign Strategies

Soft Skills:

Leadership

Creativity

Active Learning

Analitic Thinking

Design Thinking

Learning:

Fast API

LangChain

Mongo DB

Figma

Project Management

Languages:

Spanish: Native

English : High understanding in writing and reading, low-middle in Listening and low in Speaking.

Studies:

Software Engineering Ciego de Avila 2024-Present

Product Management ---University of Los Andes

Introduction to Next js --- Coursera Team

LangChain for LLM application Development ---DeepLearning

Experience :

SocialClubs

Founder, Fullstack Developer & Product Lead | Own Startup

Tech Stack: Supabase (PostgreSQL), MongoDB, Jamstack, Microservices

Key Achievements:

- Led end-to-end technical design: hybrid architecture (Jamstack + microservices), component logic, and database schemas.
- Developed product concept and UX/UI through vibe coding (MVP in progress).
- Built edge functions and designed interfaces from scratch.
- Delivered:
 - Product landing page.
 - Pre-launch mini-game (production-ready).

TechWealth

Personal Project (Next.js Learning Experience)

Tech Stack: Next.js (App Router), Supabase, TypeScript

Key Learnings:

- Dynamic routing, Server-Side Props, and Next.js App Router structure.
- First-time TypeScript integration (basic) and cache management.
- Strategic use of Server Components.

SadiChats

WhatsApp Clone for Dating/Sex (AI-Powered Side Project)

Tech Stack: Next.js, shadcn/ui, Tailwind, Zustand, Framer Motion

Highlights:

- High Styled components with shadcn + Tailwind (dark/light themes).
- Global state management (Zustand) and mock data hydration patterns.
- AI integration ("seduction/sex expert") with LangChain
- Framer Motion prototyping (*vibe coding*). .
